New Years Day opened the hockey eason here by a match between the St. Clements aggregation and our own team, which has made its of first stroke at becoming famous.
A crowd of something less than three hundred witnessed the prettiest and fastest game of hockey that has ever been played on Lin wood ice.

Although the St. Clement's forwards made many excellent rushes, Berict and Storm were as impreg-nable as a stone wall and Heimbuch must have been able to see through and around all the players at once as he was able to meet the puck at every dash and then az he sent it on its return trip it was amusing to see the interlacing of hockeys as the Linwood forwards threaded their way among their opponents only to be met by an equally strong defence. Thus the game went on but no goals were scored and ten minutes extra time had to be grant ed in order to break the equality at the close of the ten minutes, the saints, only by a desperate on-slaught and wounderful combin-ation succeeded in breaking Linwood's defence and the game was won (for them). score 1-0 for St Clements. ture, sometimes sensuality and dissipa-tion.
Ears that stand out from the bead like flais are often seen on religious men, but parsimony is apt to go with them.

A long shaped but small ear lying close to the bead denotes reinement, delicacy or perception, but also timidity, and sensitiveness. A thin, transparent looking ear shows delicacy and poetic feeding; a thick car, the reverse. An ear set rather low on the head denotes good brain capacity; set high or on a level with the eye, a limited mental ca-pacity is denoted.

Frank Cenaus Returns

Frank Cenna Returns.

British census returns are more informative than diverting, but the same cannot be said of the Indian. The Punjabr returns include professional crick-eters under the heading of "Clowns and Tumblers," regarding them apparently in the same light as Mr. Kipling. The Chemb has forty-six male, seven female and sixty-seven "dependent" plano tuners, and the inland state of Nahan rejoices in the possession of 205 shipowners, in the schedule ulso appear 117 "receivers of stoin goods" and 129 "witchies, wizards, cow poisonses, etc." There is a frankness about these ceturns which is very enguging—London Express.

Camels in Africa.

At the present day camels are used for all sorts of domestic purposes in Africa. They may even be seen drawing plows in the interior of the regency of Tunk. You may remark a woman and a camel harnessed to the same plow, and you besitate to decide which is the greater outrage. They are also used for drawing water from the strange, cumbersome, old fashloned wells of north Africa. Their chief use, however, is for caravans. You may be bold them bringing in buge cases of dates from the cuses, or you may see them with great tentilite structures of red silk upon their backs. These tents are for the conveyance of Arab women of the upper classes, who seek to maintain the privacy of the harem when on a journey. Two women and some children are often accommodated on one camel. They have cushions on which they can lie down and even sleep. It is stuffy, and it is dark, but they deem themselves well off in escaping from the searching rays of the burning sou.

First Eeropean Railway.

The first carriages that ran on rails in Europe were those of a horse railway between Linz and Budwels, in Austria. This was in working order in 1827. Locomotive railways were much longer coming. The first line, in a modern sense, was opened from Parls to St. Germain in 1835, but railway development was greatly lindered by a terrible accident on the Paris-Versailles line in 1942. The next was the Brussels-Mallines line in Belgrium. Belgrium was also the first country to begin, in 1830, systematic plans for a mattorial network of railways. Prussla followed in 1835 and Austria-Hungary in 1838. The first great trunk line in Europe was from Parls to Rouen opened in May, 1843.

The reason some people "never have any luck with pinns" is sometimes because the drainage is defective. A plant will not live in a heavy, sour, soggy soil, such as fills a pot when the drainage is not complete. This is especially true of palms, to which the stagmant moisture is sure death, but it holds true of any pot grown plant.

Wellesley Maple Jeaf

Price Reduced to 75 cents per year

URING the two years of its existence the Wellesley Ma-Leaf has had the good fortune to be a popular newspaper in the section it covers. Its circulation has never been less than 600 copies weekly.

Just'as an orator on the rostrum (in order that ALL of his hearers may get the benefit of his speech) should speak distinct enough to be clearly understood by the person sitting farthest from him in the hall, so the Maple Leaf aims to make all its news valuable and in-teresting to its most distant subscriber, knowing that all the rest will thus be kept equally posted.

The Maple Leaf aims to give ALL the home news ALL the time.

Now in order that ALL of the home people may get ALL of the home news without interfering with their taking the usual number of outside journals, we have decided to reduce the size of the Maple Leaf and devote its reading space entirely to home affairs so that we can, without loss, reduce its price to a figure that should put it in every home in this section, thus giving it a circulation of 1000 this year.

We ask our friends to help us in this matter. The coming year will be laden with important local af-fairs: The Maple Leaf will keep its readers posted on the vital rail-way question; our municipal affairs will be carefully recorded; the sug-ar beet interests watched, and in every way that a local paper can benefit its community the "Leaf" will not be lacking.

The great bulk of the people of this section take outside papers. We have made close arrangements for clubbing this season, and can give rates that will make the Ma-ple Leaf cost you almost nothing for next year
