Milverton Juniors crossed sticks with the Linwood Juniors on Saturday afternoon. The visiting team won by a score of 2-0. The game was very close and everybody enjoyed the fine winter sport. The forward line up of the visiting team was especially good. The home team put up a good defence but very much lacked an effective combination or else the score would have been different. The game was clean and swift. The Milverton boys are gentlemen and they put up a good kind of hockey.

Mrs. E. Dunke, of Elmira, spent part of last week visiting Mrs. T. J. Ruggie.

Mr. J. Friedman is drawing sand for his new house.

The second carnival of the season will be held on Linwood's new Skating Rink on the evening of Friday, Feb. 17th. Prizes will be given for costumes and fancy skating and there promises to be an excellent time. Linwood brass band in attendance. Admission, gents 25c; Ladies and children, 15c. Posters, giving full particulars, will be out this week.

SWALLOWED NITRO-GLYCERINE.

St. Paul, Minn., Feb. 4.—Peter Eberhart is supposed to be the name of a farm hand who yesterday drank a small bottle of nitro-glycerine on a wager, froze to death while walking home, and to-day exploded when efforts were made to thaw him out. Peter worked near Waukegan, Minn., and while in the village yesterday met the T. W. Marshall, who showed him a bottle of nitro-glycerine, saying it was taken from a bank robber. Peter bet that he could drink it and never feel injurious effects. He drank it and started for home. He failed to get home, but this morning he was found by the roadside, frozen to death and much distorted. He was picked up and hauled to the home of Claude Armonval, his employer, where his late "boss" undertook to thaw him out, so that the

A Remarkable Grain Exhibit.
Canada's wonderful exhibit in the Palace of Agriculture at the World's Fair is a revolution to any St. Louis correspondent to anyone who may have had an idea that the great north country was one of cold and ice all ways. No sections in Uncle Sam's galaxy of States display more or specimens of the result of the husbandman's industry and no land shows a greater variety of products than does the great country that adjoins the United States on the north. Canada has a space of 10,000 square feet in the Exposition's mammoth Palace of Agriculture—a structure that covers an area of twenty-three acres and contains all that is edible from all lands. A replica of a historic structure forms the centerpiece of this notable exhibit. One of the handsomest of the public buildings in the Dominion is the Library of Parliament at Ottawa. The dome of this building, reproduced on a smaller scale, is one of the most commanding objects in the big building. It is an octagon, thirty-four feet across, and its top extends sixty feet upward and brushes the rafters of a fabled crop grown extensively in western Canada and which appears shortly after the snow leaves the ground: wheat, oats, clover, blue grass and hundreds of other choice specimens. Corn, used so much in the embellishment of the exhibits of the States, finds no place in this display. The eight arches in the octagon afford a conspicuous place for oil paintings, portraying the life stock industry of the great country to the north. The pictures are works of art, and their great size makes the scenes very lifelike. The windows and the pointed arches are filled with bottles of thrashed grain.

EDITORIAL NOTES.

The Czar has issued a manifesto to the workmen of Russia promising to look into the matter of their grievance. He tells them that in coming to him in a body to ask for redress was an act of rebellion and the soldiers did right in quelling it. The whole tone of the manifesto indicates that the Czar is very good and they are very bad. The document appears to have very little weight with the masses of workmen and peasants, and Russia is still in a turbulent condition. Added to this the Russian forces in the far east are still being roughly handled by the Japs, and Kouroupatkin's utter defeat appears to be only a question of time.

Guelph, Berlin and Stratford are all struggling with the C. P. R. problem at present. Guelph is interested having steam branch lines to Stratford and Listowel so that more freight and traffic will be hauled over the Guelph Junction railway; Berlin's effort is to prevent the trade from the north and west being deflected from the Twin-City, while Stratford, now that it is assured of C. P. R. connection, is struggling for the doubtful benefit of a union station. From the farmers' stand-point a freight carrying trolley line which would extend from Waterloo to Listowel, with a branch to Stratford, and connecting with the main line at Galt, would furnish by far the cheapest and most convenient outlet, while amply covering the needs of the whole section. But to accomplish this scheme will require far more aggressive enterprise than the Berlin and the P. and B. trolley adherents appear to possess at present and unless they promptly and forcibly set before the highest C. P. R. magnates the superiority of their project they may shortly see the whole traffic of this section deflected in another direction. The Wellesley section has done its whole duty so far, and waits indifferently though ready at once to fall in with the plan which first develops to bring it in touch with the seaboard. Liberal bonuses were passed to the trolley project, but the people are willing to drop them and give assistance to another line if its more aggressive promoters secure the field. The C. P. R. has decided to build the coming summer, so that within the next few weeks the decision will likely be reached as to whether the road shall be steam or trolley.

The city of Stratford has interviewed President Shaghneshy, of the C. P. R., with a view of having the Hawkesville branch have a union terminal in Stratford with the Grand Trunk railway, and received pretty positive information that no such scheme would be entertained, especially if the G. T. R. controlled the station. Stratford, however, is trying to work out a plan by which the two roads would have equal privileges in a union station, acceptable to both, and while they are delaying over this matter the C. P. R. may, at least for the present, drop their Stratford branch. Berlin ought to take advantage of this opportunity to get in some effective work towards trolley development.

The Dominion parliament will soon be struggling with the problem of dividing a large portion of the Northwest Territory up into Provinces. This will involve the question of deciding upon the separate school system for those proposed new Provinces. The separate school system, as operated in Ontario, is probably as fair a scheme of the kind as could be evolved, yet

comes far short of giving public satisfaction. The feeling is growing in all quarters that religion, so far as creeds are concerned, should be entirely eliminated from the schools, and the time is coming when a reform of this kind will be effected in Ontario. Now that the new Provinces are to be created their constitution should draw the lines between Church and School as distinctly as between Church and State. These new Provinces should not be handicapped by a system which has caused, and is causing, endless troubles in the older Provinces. Unfortunately our Dominion electorate is not yet sufficiently educated on this subject to justify the premier in risking the overthrow of his Party by introducing this radical change in giving autonomy to these new Provinces, but the case is one in which a Dominion plebiscite could be taken with as much, if not more, reason than was recently done for prohibition.

Premier Parent is troubled at present with too large of a majority. The other day three of his ministers resigned and there is an apparent effort on foot to oust Mr. Parent from the premiership. He is staying by his guns, however, and will not drop the reins without a struggle.

HEALTHY HORSES

The horse has but one stomach, and has but one chance at his food, so it is absolutely necessary to extract the largest amount of good from either overworked or underworked, and it suffers much from impaired digestion. This is followed by stagnation of the blood and a whole host of diseases. No trouble should be too great, to get and keep him in good shape for his every day work. Clydesdale Stock Food, with its ordinary feed, regulates his whole system by aiding the digestion, loosening the bowels, stimulating and correcting the action of the liver, more work and on less feed. It can be stopped at any time without bad results. Mr. H. B. McEischen, Harriston, Ont., says: "I have used your Clydesdale Stock Food for the last six months in my stable, and I find it is the best tonic I have ever used, and it is the only tonic that when used in feed like they will with other Stock Foods. No better remedies on the market than Clydesdale Heave Cure, Colic Cure, Worm Powder, Gall Cure, Embrocation Liniment and Tar Foot Remedy; they should be kept handy. You never can tell when they may be needed. If the above preparations are not found satisfactory your money will be refunded cheerfully by our dealers in your district, namely:

THE RAILWAY SURVEY.

The line of survey for the new Stratford-Walton railway arrived here last Friday, having crossed the river just east of Lisbon. The survey passes the village on the west side of the pond, through the west corner of Miller's bush. From here to Crosshill three lines were laid out, two of them on the west side and one on the east side of the section line, the grade having been found quite steep. The surveying party consists of a dozen or so of stalwart and jolly young men who gained the friendship of everyone during their weeks headquarters here. Yesterday morning the party left here to commence the survey from Crosshill to Walenstein, expecting to have that line finished by about Saturday or Monday. The bills of Wellesley township have proved somewhat difficult and it is possible that another trial line will be surveyed before Engineer Patton's work is finished in the township.

Careful WATCH

NO wonder the possessor of a good watch is so careful into whose hands he leaves it for repair when it fails to work. Many a good watch is left in bad hands, and is spoiled by incompetent or careless repairing.

Does your watch need attention? Don't run the risk of having it spoiled. We do thorough watch repairing.

Will You Help It?

THE HOSPITAL FOR SICK CHILDREN

For It Cares for Every Sick Child in Ontario whose Parents Cannot Afford to Pay For Treatment.

The Hospital for Sick Children, College Street, Toronto, appeals to the fathers and mothers of Ontario for funds to maintain the thousand sick children that it nurses within its walls every year.

"GOOD DAY, DOCTOR."

Since its foundation the Hospital has treated 16,371 children—a boy 7,500 of these were unable to pay and were treated free. Every dollar may be the translator of your kind thoughts into the Hospital kind deeds.

Everybody's dollar may be the Friend in Need to Somebody's child.

Let the money of the strong be mercy to the weak. The Hospital pays out dividends of health and happiness to suffering childhood on every dollar that is paid by the friends of little children.

See the example of what can be done for club-foot children. There were 14 like some last year and have been in 28 years.

BEFORE

PLEASE send contributions to J. Bee Robertson, Chairman, or to Douglas Davidson, Sec. Treas., of The Hospital for Sick Children, College Street, Toronto.

The Hospital is not a local institution—but Provincial. The sick child from any place in Ontario who can't afford to pay has the same privileges as the child living in Toronto and is treated free.

The Hospital had last year in its beds and cots 761 patients, 287 of these were from 196 places outside of Toronto.

MARRIAGE

The cost is 98 cents per patient per day, and there were 123 sick little ones a day in the Hospital.
