#### EDITORIAL NOTES,

This seems to be an off year for winter weather prophets. Those who base their predictions upon the warmth of muskrat's nest and oth-er similar signs promise an open winter. On the other hand the ones who judge by weather signs say "the swamps are now full and heavy snow falls may be looked for any day."

It begins to look as if Rev. Irl R Hicks, author of the famous Hicks Almanac, has discovered the correct system of foretelling weather conditions. He bases all his predictions upon scientific astronomi-oal and geological deductions and he takes pains to give his basic rea-sons for every forecast he makes. His "long range predictions" are much nearer correct than those by the United States Weather Bureau sent out a few hours in advance, and thousands of intelligent men and thousands of intelligent men-all over the continent implicitly be-lieve in him. Since "nothing in nature comes by chance" it is the bounden duty of Intelligence to find out the reason of thinge and profit thereby. Rev. Mr. Hicks is entitled to more honors than he is

The new law with regard to the teachers' salaries has perturbed many school sections in this vicinities as velles in other parts of the Province. Enough is paid in salaries within five miles of Wellesley to pay the entire cost of equinpay the entire cost of equip the district to and from their homes to one central school where they could be much more scientific and economically taught, and carried much farther in high school

Berlin and Waterloo Boards of Trade have met to discuss the ex-tension of the trolley system on to tension of the trong years of a reso-this township. They passed a reso-lution with a whole lot of whoreas-as in it, requesting the C. P. R. to extend the electric line to Welles-ley—and Linwood. From this village to Linwood the road would not get one cent of bonus because people are already served by the C. P. R. at Linwood; and the Com-pany would not be likely to build a pany would not be likely to build a road at their own expense through a section whose traffic they already get. If the Twin City wants coun-try help in their enterprise why not cut out the Wellesley-to-Limwood dream and substitute a shorter, more profitable and nuch more needed super from pear. Bambers needed spur from near Bamberg north via St. Clements, Heidelberg and Hawkesville to Wallenstein? If this ider is adopted the resolution which the joint Boards passed can have one more "whereas" added to read: "And Whereas every inch of this road would be a money-maker for the Compuny, the Twin City and the people." That's the kind of a "whereas" that counts with railroad companies.
